

CA-003M

Water Basic Acrylic Resins

Sheet 1 of 1

ITLS INTERNATIONAL DEVELOPMENT CO., LTD

DESCRIPTION

CA-003M is water basic for acrylic resins, which is flexible and elastic and transparent when formed. CA-003M is also exhibits good compatibility with cement.

PROPERTIES

1. Feasible on porcelain bricks.
2. Joint fillers and caulking compounds.
3. Complimentary to solid cement water-proof capacity.
4. As a bonding agent to bond new concrete to old concrete.
5. As a plasticiser for cement and sand plastering to improve workability.

TECHNICAL DATA

Composition	Acrylics copolymer
Appearance	Milky white emulsion
Solid content	20 ± 1.5%
Viscosity	8000 – 11000 cps (LVT, No.3/6 25)
pH	6.5 – 8.5

WARNING AND PRECAUTIONS

1. Employ an emetic method with great amount of water when eating.
2. Keep away from eyes and skins.
3. Restricted only to industrial use.
4. For details, please refer to Material Safety Profile.

FEATURES

CA-003M is applicable to cement mixture and able to enhance the cement efficacy.

Safety:

CA-003M is a water basic of adhesiveness which is safe.

Cleaning Method:

Wipable with a wet rag.

NOTES

1. Storage life : one year.
2. The product should be kept at location with temperature below 40 , avoid direct sunlight.
3. Flammable feature : CA-003M is a water basic of adhesiveness which is unlikely to burn.
